Law/Education/ Department.

Sir,

I have the honour to submit herewith a scheme for the introduction of "Sericulture" as a vocational subject in the Board High School,Kollegal,with effect from the beginning of -- the school year 1922-23.

2. The course which will commence in Form I with the rearing of the silk-worm and proceed thence to the several processes of -- "Sericulture" ~~which~~ will be covered in 4 years and will be completed in Form IV. In the first year,the subject is proposed to be taught in Forms I and II to be extended to the Higher -- forms in successive years.

3.Accommodation. To accommodate the classes a temporary shed is proposed to be put up at a cost of Rs.350/-

4. The President requests that a moiety of both the capital and recurring expenditure may be sanctioned by Government.I accordingly recommend that one-half of the total expenditure to be incurred during the current and following years may be met by Government.The extra subsidy payable on account of the scheme may be a charge on the lump provision of Rs.1.5 lakhs entered in the current years budget on account of Vocational Education. The annual recurring and non-recurring charg amount to Rs.744 and Rs.550 respectively as shown in the margin

Copy of letter dated 3rd April 1922 from C.R.Porrett Esq., Teachers' College, Saidapet to the Director of Public Instruction.

I agree with the recommendations of the Inspector of Schools, Coimbatore and the Nilgiris, to start classes in Sericulture in the Kollegal Board High School.

The estimates for the recurring and non recurring costs seem to be moderate.

As this scheme appears to be a serious attempt to teach a cottage industry on modern lines and as there is a growing demand for the finished products. I would recommend this scheme to the Director for favourable consideration.

From the Inspector of Schools, Coimbatore and Nilgiris, endorsement R.O.C.No.288 ~~of~~ 1 of 1921 dated the 19th December 1921.

It is suggested that the course be begun in Form I. The work here will be confined to the rearing of silk worms; it will be light -- and well adapted to the physical capacity of young children. And the rearing and study of silk worms makes an applicable form of Nature Study. Mr.Achya, estimates that the whole process of - sericulture from beginning to end might easily be covered in 4 years at 2 hours a week. The course will thus be completed in Form IV it will not interfere with the work of Forms V and VI where the pupil's chief concern is with the S.S.L.C public examination. In this connection it is suggested that in the first year sericulture be taught to forms I and II in the second to Forms I and II and III and so on.
